

University of Colorado
Boulder

Keith Tauscher

- 5th year physics graduate student, PhD candidate
- Works with Jack Burns, Neil Bassett*, and David Rapetti
- Works on extracting the global 21-cm signal (ripples in cosmic microwave background due to neutral hydrogen's ground state hyperfine transition) from foreground-contaminated all-sky radio data at ≈ 10 -200 MHz frequencies

- Hobbies:

*Look for his presentation here at LunGradCon as well as his talk at the Exploration Science Forum!
